Boone County Resource Management

SUBJECT: Design
Rustic Road, Boone County
Federal Job No. IBRD 9900(592)
Public Interest Finding

I do hereby certify that in accordance with the requirements of 23 CFR 635.411(a)(3), this patented or proprietary item is required for research on a relatively short section of road for experimental purposes.

Eric Schroeter, State Design Engineer

With reference to the above mentioned project, we request approval of a finding in the public interest to use the CONSTRUCT™ Single Steel Tub Girder System manufactured by McCann Concrete Products, Inc for research purposes as permissible by 23 CFR 635.411(a)(3).

The use of this product is an integral part of the innovative bridge funding that was applied for with this project. It is included as a required item in order to research its applicability in the State of Missouri.

This product has the benefit of reducing construction time on a dead end road and thereby reducing any additional time of road closure that would adversely impact the residents on the far side of the bridge.

Approval of this request at your earliest convenience would be appreciated. If you have any questions feel free to call me at (573) 886-4480.

This project is scheduled for an April, 2014 bid opening.

Derin Campbell, PE
Chief Engineer
Boone County Resource Mgmt.
